

# X. WORLD ORDER

## Restructuring Protocol

The former world has passed. It is time to move on and begin the reconstruction process. X. Waddles International is the last structured organization in the world and is poised to set up a new world order; the X. World Order. Your task is simple: the remaining survivors will form independent committees to form new nations. Using the information below, your committee will travel to these destinations and look for the X. Waddles International logo. When discovered, use one member's phone to take a picture of the group holding the flag and performing your group's pose. Send that picture to the project leader and wait for information about the next destination. Following arrival at each destination, record your heart rate in the space provided. Be the first to claim all the land. Time is crucial... make Xavier Waddles proud.

## Restructuring Protocol

Provided for your group below are hints at where the X. Waddles International logo may be placed out in the environment. Each numbered picture corresponds with the sequential number on the list from the destination page. This is not the order in which you will be traveling to each destination. A simple reminder, once you arrive at a destination, find the logo and take a picture of it with your flag while performing your national pose. Send that picture to your Project Leader who will be stationed at the command center. Once your photograph has been received, your Project Leader will respond via text message which clue you are to proceed to next. If the pictures are not sent in your group's unique sequential order, you will be disqualified and sent to the holding cell. Again, good luck.

## Restructuring Protocol

Provided for your group below is a grid/chart necessary to fill in your heart rate at each destination. You will begin by recording your resting heart rate in the column labeled 'Resting.' For each destination you visit, you will record your heart rate before you take a picture of the specified destination. Heart rates will be filled in for each destination beginning with the 'Alpha' column and culminating in the 'Lima' column. Following the final destination, you will record your final heart rate in the "Final" box. It is crucial that you record your heart as it provides the organization with a look into the amount of physical fitness and endurance necessary to travel between destinations. If you fail to record your heart rate for all of the destinations provided, you will be disqualified and sent to the holding cell. Again, good luck.
