

WELNET from Focused Fitness – Technical Information

General Features	
Central Management - Server	None. The server is owned and maintained by Focused Fitness at our location and is accessible from any internet access. WELNET use is a renewable license and is a service access and holding site for your data. There is no server, (hardware, software, maintenance, IT user support, etc.) at the district site.
Database – Type (Oracle, SQL, MySQL, Access)	MySQL
OS – Supported OS's	Client: Windows XP, Vista, 7. MacOS. (Remember that we host the service)
Hardware Requirements (Minimum and Recommended) both client and server	Client only: any Windows or Macintosh machine capable or running one of the supported browsers with internet access.
Web Based Application	Yes, web based only. Our system is different than others because <u>we</u> maintain the server--there is no hardware/software/network for the client to buy, maintain or upgrade other than user access to the internet.
Security Requirement	User name and Password required to login. Please see attached WELNET Privacy Policy for the full scope of security and restriction.
Does it support LDAP	No, not needed, because there is not a server at your site. We are Web-based and users will need to reach and log into our system.
Supported Mobile Devices	Under development. Some currently work with a browser but not supported at this time.
Browser based support	Yes. Windows: Internet Explorer 6, 7, 8 & 9, Firefox. Mac: Safari.

WELNET from Focused Fitness – Technical Information

<p>How many customizable data fields (modules)</p>	<p>WELNET offers separate modules which can be purchased as needed. (Please see the attached WELNET Pricing Information for additional explanation and detail.) The Fitness Module can be customized. You chose the fitness measurements you will use. No limit to the number of fitness measurements at each of the three levels; Basic, Intermediate and Advanced, (Elementary, Middle and High School).</p>
<p>ADHOC Reporting</p>	
<p>ADHOC Reporting – Specify Tool Used</p>	<p>No ADHOC Reporting. Standardized reports are included with a wide variety of levels and choices. However, we can extract and upload your data by request.</p>
<p>Reporting Levels – Individual – Group – School – District</p> <p>Customizable Reporting</p>	<p>Student, Class, Teacher, School, District. Also three levels Elementary, Middle and High School.</p> <p>Parent report is customizable and by special request as needed by each client. We also can extract data from our system and upload into your district system(s) in the format you specify.</p>
<p>Software Support & Training</p>	
<p>Available Support & Support Hours</p>	<p>Support is available by phone and email. Live support hours are 8:30 AM to 4:30 PM PST. Responses to emails within 24 hours.</p>
<p>Number of Support Staff Personnel?</p>	<p>We have six, full-time WELNET support personnel. Because of the reliability and ease of use of the WELNET system--even with 50+ current, active clients--we only need a very small front-line support staff of two who are backed up by four WELNET programmer specialists. As our district user numbers grow, we add personnel.</p>

WELNET from Focused Fitness – Technical Information

How often is the software updated?	Because the software is browser based, client updates are not required. The system is updated as needed for corrections and to add enhancements on an on-going basis at our server site and these enhancements are passed along to the client as available.
Training - suggested training - how much - included in a purchase price - and after	The system is very user-friendly and very easy to navigate, even without training. There is no training included in the initial set-up fee because a variety of different types of training can be arranged; on-site group training, train-the-trainer and webinar. WELNET training can be integrated into curriculum activity training for those clients using the Five for Life or as a WELNET/Fitness Measurement Protocols training. (Please see attached Training document.)
Data / Implementation	
Data Import - Bring in external Data - Historical Data	Yes. By request, as needed by client.
Daily Automatic Updates from Student Information System	Yes. The district extracts roster information daily and uploads it to our server via a SFTP as pre-arranged.
