Enhancing Youth Leadership through Sport and Physical Education

Daniel Gould, Ph.D.

2011 Raymond A. Weiss Lecture

- A man of humanity is one who, in seeking to establish himself, finds a foothold for others and who, desiring attainment for himself, helps others attain.

- Confucius (as cited by Ray Weiss (2006))

The Institute for the Study of Youth Sports (ISYS)

MICHIGAN STATE UNIVERSITY

Acknowledging Youth Leadership Research and Outreach Team

- Dana Voelker
- Jed Blanton
- Dr. Sarah Carson
- Dr. Larry Lauer
- Katie Griffes
- Michael Crawford

Purpose

Examine the role that sport and physical education can play in developing youth leadership by:

1. Reviewing and critiquing the research on developing leadership in general, youth leadership, and youth leadership in sport and physical education.
2. Derive implications for guiding professional practice.
Introduction: Why Youth Leadership Development

• Physical educators and coaches have long held belief that participation in sport and physical activity programs play an important role in developing youth leadership.

"The battle of Waterloo was won on the playing fields of Eton".
- The Duke of Wellington

Dana see if we can find a better quote that sports builds leadership via mere participation

Vince Lombardi

“Leaders aren’t born, they are made. And they are made just like anything else, through hard work.”

The Importance of Developing Leadership in Youth

• Developing Youth Leadership May Be More Important Than Anytime in Our History
  - Nationwide polls show this is the first generation that expects their children will be less better off than they were.
  - The US is losing ground economically, socially and educationally to other countries.
  - The World is facing major issues like global warming, ethnic clashes, and increasing demands on diminishing resources.
  - Because of these concerns parents and grand parents are interested in maximizing their child’s life skills, like leadership, to help prepare them to be successful in an ever changing and complex world.

The Importance of Developing Leadership in Youth

• Leadership development is broader than a physical education or youth development problem.

Managers (leaders) "must admit first that they have reached the limits of management 1.0: the industrial-age paradigm built atop the principles of standardization, specialization, hierarchy and control. Second, they must cultivate, rather than repress, their dissatisfaction with the status quo….Leaders at all level of the organization play a vital role in the design and implementation of the patient-care delivery system and in creating and sustaining the culture to support it. Caring and compassionate service evolves from caring and compassionate leaders.”
- Karsten (2010) Nursing

Why Sport and Physical Activity Contexts are Conducive to Teaching Youth Leadership

Martinek and Hellison (2009)

• Sport and physical activity contexts are highly interactive.

• Provide numerous leadership opportunities or “moments” for young people to gain leadership experience (e.g., enforcing rules for teammates).

• Sport and physical activity provide an opportunity for youth to learn leadership in an enjoyable, motivating way.
Why Sport and Physical Activity Contexts are Conducive to Teaching Youth Leadership  
(Gould, Voelker & Blanton, in press)  
Of all the venues that may be used to develop leadership in young people, competitive sport appears to be one of the most potent but underutilized. Why?  
- Sport is highly valued in many societies,  
- Sport is an activity that young people are highly motivated to pursue and where youth believe their actions have important consequences.

Alabama Football Coach Bear Bryant Quote  
- "It's kind of hard to rally 'round a math class!"  

The Paradox: The Opportunity & Problem Facing Us  
- The Opportunity: Physical educators and coaches firmly believe that participation in their programs develops leadership in young people.  
- The Problem: Mere sport and physical activity participation does not teach people to lead. Effective physical educators and coaches who intentionally create the right conditions that teach and facilitate youth leadership development do.

The Importance of Developing Leadership in Youth: Being Realistic!  
- Sport and physical education cannot solve the leadership needs of America’s youth, but we can certainly do much more to “intentionally” help young people develop their leadership capabilities and skills.  
- We cannot only make them physically fit but we can teach them life skills, like leadership, that enable them to be more productive members of society.

General Leadership and Leadership Research  

What Is Leadership?  
Leadership is a complex process that involves the effort of an individual (i.e., a leader) to help groups identify and achieve personal and group goals.  
- adapted from Northouse (2010)
What Do We Know About Leadership In Adults?

• Literally Thousands of Studies
• Numerous Theories (e.g., Trait approach, Path-goal, contingency, transformational, servant, psychodynamic)
• Much has been learned, but more research is certainly needed (American Psychologist, 2007)

What Do We Know About Leadership In Adults? (Avolio, 2007)

• Findings have revealed that leadership is a complex process that involves the interaction of:
  - leader characteristics
  - follower characteristics and needs
  - situational influences
• Researchers must consider the leadership context while examining the dynamic interaction between leaders and followers.

What Do We Know About Leadership In Adults? Call for a Paradigmatic Shift in the Kinds of Questions Needed to Advance Leadership Research (Hackman & Wageman, 2007, p. 43)

(1) Not do leaders make a difference, but under what conditions does leadership matter?
(2) Not what are the traits of leaders, but how do leaders’ personal attributes interact with situational properties to shape outcomes?
(3) Not do there exist common dimensions on which all leaders can be arrayed, but are good and poor leadership qualitatively different phenomena?
(4) Not how do leaders and followers differ, but how can leadership models be reframed so they treat all system members as both leaders and followers?
(5) Not what should be taught in leadership courses, but how can leaders be helped to learn?

General Youth Leadership and Leadership Development

• Youth leadership has been defined in many ways
  - At times, viewed so broadly that it is difficult to distinguish it from positive youth development in general.
  - At other times, youth leadership is seen as involving specific individual skills and attributes such as emotional intelligence, self-esteem, and moral character.
### Determining What Youth Leadership Involves

- Reviewing the literature is challenging and complicated process because authors do not precisely specify what youth leadership is and what it involves.
- Baker (1997) also indicates that these definitional issues makes it difficult systematically develop youth leadership without precisely defining it.
- **KEY:** Researchers and practitioners must be clear about how youth leadership is characterized to effectively study and develop it in young people.

### Research Areas Associated With Developing Youth Leadership

- Leadership and factors associated with becoming a leader
- Advantages and consequences of being a leader
- The measurement of youth leadership
- Leader training effectiveness.

### Advantages and Consequences of Being a Youth Leader

- Merely being an athlete does not correlate to adult leadership, although practicing leadership as a captain or school leader does (Extejt & Smith, 2009; Kuhn & Weinberger, 2005).
- Not all consequences of youth leadership may be positive (e.g., Bullying maybe a form of destructive leadership) (Ferris, Zinko, Brouer, Buckley, and Harvey (2007)).

### The Measurement of Youth Leadership

- Measurement is a significant problem in the youth leadership research, especially the development of psychometrically sound instruments that are developmentally appropriate (Extejt & Smith, 2009; Kuhn & Weinberger, 2005).
- Few good measures exist and a need exists to validate adult measures for use with youth, and developing measures specifically focused on youth leadership (Oakland, Falkenberg, and Oakland (1996)).
Leader Training Effectiveness

- Leadership training effectiveness studies suggest that youth leadership training programs can effectively enhance leadership attitudes, behaviors, and skills in youth.

- Studies that further verify program outcomes and link demonstrated effects to specific theoretical contentions and intervention components are needed.

What Is Known About Developing Youth Leadership

Youth Leadership Development Model
van Linden and Fertman (1998)

Unfolding Stages
- Stage 1: Awareness
- Stage 2: Interaction
- Stage 3: Mastery

Leadership Dimensions
1. Leadership information (e.g., what youth know about leadership and leaders)
2. Leadership attitude (e.g., thoughts, dispositions, and feelings youth have about themselves as leaders)
3. Communication skills
4. Decision-making skills
5. Stress management skills.

Note: Youth move from transactional to transformational skills.

Fundamental Principles of Youth Leadership

- Effective leadership results from the reciprocal interaction of leader characteristics (e.g., traits, orientations, behavioral skills), follower characteristics (e.g., traits, orientations, behavioral skills), and situational influences (e.g., resource availability, such as program funding).

- All young people can and need to learn leadership skills. However, certain youth will have characteristics and previous experiences that will increase their capacity to lead and enhance their leadership effectiveness.

Fundamental Principles of Youth Leadership

- Cultivating leadership in young people is difficult when adults dominate their environment.

- Developing youth leadership is as much an issue of adults giving young people responsibility and giving up control as it is about developing programs for youth.

Fundamental Principles of Youth Leadership

Learning how to lead is multi-faceted and involves:
- Observational and experiential learning,
- Trial and error,
- Mentorship, and
- Formal education

(Doh, 2003; Kempster, 2006; Kouzes & Posner, 1987; Martinek & Hellison, 2009)
Fundamental Principles of Youth Leadership

- Effective youth leadership development requires experiential learning.
- Young people in a leadership role need supervising adults to allow them to make "meaningful" decisions and to become active agents in their own development.

Leadership Research in Sport and Physical Education

- Dana can you add some pe slides also some diversity

Leadership Research in Sport and Physical Education

**Adult Studies**

1. Most conducted on coaches leadership or athletes' perceptions of their coaches leadership.
2. Some studies conducted on athletes (emergent peer leaders, captains)
3. Results typically parallel the general psychology and business psychology literature.
4. The body of work is more limited in both theoretical scope and sheer number of studies conducted

Sport Psychology Studies on Adult Leadership

**Two Dominant Leadership Models**

- Chelladurai’s multidimensional model of leadership (Chelladurai; Chelladurai & Saleh, 1978)
- Smoll and Smith’s (1989) cognitive-mediational model.
- Some initial work has also focused on the application of transacational-transformational leadership models to sport (e.g., Rowold, 2006).

Leadership Research in Sport and Physical Education

**Youth Studies**

- Youth Development Through Physical Activity and Education Studies
  - e.g., Hammond-Diedrich and Walsh (2006)
  - Martinek, Schilling, and Hellison (2006)
- Youth Sport Studies
  - e.g., Price & Weiss (2011)

Youth Leadership Research in Sport and Physical Education
Youth Sports Leadership Research Areas

- The Importance of Leadership as a Life Skill
- Psychological factors associated with youth leadership in sport.
- Roles, responsibilities, and behavioral factors associated with youth leadership in sport.
- Youth leadership development and training in sport.

The Importance of Leadership as a Life Skill for Youth

Gould et al. (2006) High School Coaches Ratings of Problems in Sport Today Survey Results

- M = 3.31 Failure to Take Personal Responsibility
- M = 3.07 Poor Communication/Listening Skills
- M = 3.07 Lack of Motivation/Work Ethic
- M = 3.07 Athlete Having Problems With Parents
- M = 3.05 Poor Grades
- M = 2.93 Poor Leadership

Martin & Lavallee (2009) Focus Groups

Psychological Factors Associated With Youth Leadership in Sport

Price & Weiss (2011)

- Purpose: Examine peer leadership in sport by examining relationships among personal characteristics, peer leadership behaviors, and team outcomes.
- Participants: 191 adolescent female soccer players

Price & Weiss (2011) Results

Cannical correlational analysis showed:
- That peer leaders were characterized by higher perceived soccer competence, peer acceptance, behavioral conduct and intrinsic motivation.
- Effective peer leadership was associated with players who reported greater task, social cohesion and collective efficacy.

Roles, Responsibilities, and Behavioral Factors Associated With Youth Leadership in Sport

- Purpose: Gain an in depth understanding of high school sport leadership experiences (e.g., roles and duties, ways their leadership ability was developed, attitudes towards sport leadership development programs)
- Method: Qualitative interviews with 13 former high school captains (7 males, 6 females)

Voelker, Gould & Crawford (2010) Perceived Roles and Duties Results

- To Organize
- To Set An Example
- To Mentally Prepare Teammates
- To Motivate & Encourage
- To Provide Feedback
- To Provide Support & Mentorship
- To Enforce & Confront
- To Facilitate Relationships
- To Be Vocal
Roles, Responsibilities, and Behavioral Factors Associated With Youth Leadership in Sport

Voelker, Gould & Crawford (2010)

Perceived Roles and Duties Results

• Little or No Training
  – 11/13 Captains

Voelker, Gould & Crawford (2010)

Example Quote of Little or No Training Results

“I just think it was kind of implied. Cause I mean we were both freshman and we both came up 4 years seeing both bad and good captains… [Coach] just assumed that we could take it from there…I wouldn't say that he taught directly, I would say he taught like indirectly. You know where you take it.”

Youth Leadership Development and Training in Sport

Hammond-Diedrich & Walsh (2006)

• Purpose: Assessed the effectiveness of a cross-age responsibility-based program designed to promote leadership in 11 to 15 year old underserved boys who taught physical activity to fourth grade youth.

• Qualitative Single Group Design: Using formal interviews, lesson observations, and field notes to measure leadership development.

• Results revealed that the program was effective in that the youth improved their leadership skills and became more confident as leaders. The authors noted, however, that consistency was problematic in some of the participants.

Youth Leadership Development and Training in Sport

Gould, Voelker, & Griffe’s (2010)

• Purpose: To gain an in depth understanding of how high school coaches mentor their captains in effective leadership practices

• Specifically:
  – Leadership Philosophy
  – Training Methods
  – Biggest Mistakes

• Qualitative Single Group Design: Interviewed 10 Current High School Coaches
  – Known for developing leadership

Youth Leadership Development and Training in Sport

Gould, Voelker, & Griffe’s (2010)

Proactive Methods for Training Captains Results

“Conduct Formal Training Example Quote Results

“We run a 10-week leadership class with my seniors the year before. Part of what we use is Jeff Janssen’s book on team captains. Every week we go through a chapter… Sometimes I’ll teach it…and sometimes I’ll make them teach a part of it to the rest of the seniors… And that really tells them exactly what a leader is, what their roles are…”

- Coach 1 -
### Youth Leadership Development and Training in Sport

**Gould, Voelker, & Griffe’s (2010)**

#### Lessons Learned Results

- Develop a strong leadership philosophy
- Practice empowerment
- Be proactive in your training approach

#### Biggest Mistakes Results

- Giving Too Much Responsibility
- Not Giving Enough Responsibility
- Using Poor Selection Practices
- Not Communicating
- Failing to Reinforce/Educate
- Having Inappropriate/Poor Relationships
- Making Assumptions

---

### Implications for Guiding Practice

**Do we have a scan of our captains leadership booklet**

---

### Youth Leadership Development and Training in Sport

**Gould, Voelker, & Griffe’s (2010)**

**Biggest Mistake Example Quote Results**

> “One of the mistakes that I made early on in my coaching career is just assuming that a kid knew how to put the captain hat on. As a teacher I can’t assume students walk into my class knowing all about the French Revolution. I can’t assume then that my athletes know all about how to be a good person… I can’t assume that they know their role…”

- Coach 5 –

---

### Implications for Guiding Practice

**Cultivating Leadership in Team Captains**

- Leadership appears to be under-recognized–many coaches appear to be frustrated with the leadership on their teams, but few appear to proactively develop leadership skills in their athletes.

---

### Implications for Guiding Practice

**How Coaches Can Cultivate Leadership?**

- Be Proactive: Determine what leadership is for you, why is it important, and how can you best develop it in the young people you work with?
- Serve as positive role models, providing a mentorship experience to those young people we work with.
- Teach their students and athletes about leadership principles and provide feedback on their student’s and athlete’s leadership skills throughout the season.
**Implications for Guiding Practice**  

**Cultivating Leadership in Team Captains**

- Enhance captains' feelings of empowerment and autonomy by providing opportunities to lead and legitimate leadership roles with clear expectations and reasonably challenging responsibilities.
- Promote and support other leadership learning venues by encouraging captains to attend leadership development initiatives.
- Hold captains accountable for leadership lessons learned.

---

**Fundamental Principles of Youth Leadership** (Gould & Voelker, 2010)

Youth captain's leadership development occurs in stages:

- Awareness of one's leadership capacity.
- The development of basic transactional skills (e.g., making eye contact when communicating, focusing on positive reinforcement).
- Moving to more transformational or abstract interpretations of and interventions into one's environment (e.g., understanding the complexity of leader-follower dynamics, developing and sharing a team vision, eliciting positive behaviors from followers).
- Transferring leadership skills and aptitudes across situations and contexts.

---

**Implications for Guiding Practice**  
Martinek and Hellison (2009) and Hammond-Diedrich and Walsh (2006)

- An empowerment approach is absolutely necessary for developing youth leadership.
- It is important for adult leaders to pinpoint and acknowledge examples of good leadership for young athletes.
- Cross-age teaching is an excellent way to help young people learn to lead.
- Students must be given numerous opportunities to reflect on their leadership experiences.

---

**Implications for Guiding Practice**  
Martinek and Hellison (2009) and Hammond-Diedrich and Walsh (2006)

- Adult leaders must establish meaningful relationships with youth leaders and provide frequent opportunities for interaction and dialogue.
- Adult leaders should help young people engage in the broader community.
- Adult leaders should focus their attention on youth leaders' strengths rather than their weaknesses.
- Adult leaders should help youth learn to problem solve by formally listing problems and discussing how to solve them.

---

**Implications for Guiding Practice**  
Martinek and Hellison (2009) and Hammond-Diedrich and Walsh (2006)

- Adult leaders must regularly help youth leaders self-evaluate their leadership practices.
- Adult leaders must assist youth leaders in assessing current leadership abilities and identifying future goals.
- Adult leader guidance and feedback are critical to youth leader development.

---

**Youth Leadership Development Model**

Summary and Conclusions

Developing Youth Leadership is an Imperfect Process

• Young people can certainly learn to lead and become effective in leadership roles.

• However, some will struggle with taking on responsibility, mastering the skills needed, learning how to effectively interact with others, and following through on commitments.

Developing Youth Leadership is an Imperfect Process

• Coaches and other adults fostering youth leadership in young athletes must understand this fact, demonstrate patience, and be sure not to overreact by taking too much control when problems do occur.

• The key is to recognize that making mistakes, acknowledging them, and devising plans for improvement is an integral part of the leadership learning process, especially in young people.

Effects of Coaching on Young People

• Alonzo Stagg Quote:

> Legendary football coach Alonzo Stagg was asked if he had a successful season. Stagg’s response, “I don’t know, I need to wait 30 years to find out.”

• True Youth Leadership Development Takes Years to Determine
