

The Maze.....

Objectives: Sequencing, retention of information, listening, observing, problem-solving, and teamwork

Directions: Using the below spot mazes, create a line pattern from START to FINISH. Follow the rules for engagement that are listed below. Once the pattern moves up a row the pattern can't backtrack. Once a spot is used, it can't be used again.

RULES:

- Start position is always at bottom right of maze and FINISH is always at upper far left.
- Once a position on a new row is attained the pattern can only go sideways, forward/up or diagonal directions.
- Once a spot is used it can't be used again.

VARIATIONS:

- Create patterns using rows forward/up and backward/down to add difficulty
- Use spots more than once in the correct pattern of the maze to add difficulty
- Use concepts or numbers on the spots (fitness concepts, character qualities)
- When using character concepts (courage, honesty etc...) have students walk the correct pattern using a word of their choice in a sentence after pattern has been identified.
- Do the activity without verbal communication among group members
